SUMMARY

MERN Stack Developer with 2+ years of experience building scalable web and mobile applications. Skilled in MongoDB, Express.js, React, and Node.js, with hands-on experience in real-time features, authentication, payment integration, and REST APIs. I focus on clean architecture, intuitive interfaces, and delivering efficient, user-centric solutions across e-commerce, ERP, and service-based platforms.

EXPERIENCE

React Native Developer, React Developer, Diginest solutions 05/2023 – 01/2025
Technopark, Trivandrum

- Engineered a robust hybrid software solution for Diginest solutions, leveraging React-native and javascript for seamless cross-platform functionality.
- Created and maintained mobile applications catering to the unique needs of clients.
- designed and developed e- commerce applications for Bitesmate, Qbuy panda
- Maintains and collaborates on React web applications for RightPath and the Bitesmate admin app.

React developer, Lifisin Technologies Pvt. Ltd. 01/2025 – 08/2025
Ernakulam, Kerala

- Collaborated closely with the product team on ERP modules, specifically HR and Payroll/Salary management features.
- Developed and maintained user interfaces using React, TypeScript, and Redux Toolkit, ensuring a scalable and maintainable codebase.

Built reusable components and managed application-wide state with Redux Toolkit for seamless data flow across HR and salary modules.

- Worked closely with backend engineers and QA to ensure timely feature delivery and bug resolution.

AYUR-DX - Ayur Dx- Cure and Consultation

- Developed and launched Ayurdx Cure, a comprehensive mobile application for purchasing medicine.
- Integrated Firebase Push Notifications to ensure users receive real-time updates about their orders and offers.
- Incorporated PhonePe Payment Gateway to enable secure and seamless in-app payments.
- Utilized cross-platform technology to deliver consistent performance on both Android and iOS platforms.
- Play store Link: https://play.google.com/store/apps/details?id=com.diginest.ayurdx&pcampaignid=web_share
- App store Link: <https://apps.apple.com/us/app/ayur-dx-cure-and-consultation/id650361636>.

Bitesmate - Food ordering app

- Led the development of Bitesmate, an innovative online food ordering service, incorporating a slot-based ordering system for seamless and time- efficient food delivery.
- Designed and implemented intuitive user interfaces for effortless navigation and enhanced usability.

Styled the application using Tailwind CSS and react-native-paper, ensuring a responsive, modern design with utility-first style for efficient development and customization.

- App store Link: <https://apps.apple.com/in/app/bitesmate/id67367597>.

QbuyPanda - E-Commerce platform

- Developed an eCommerce platform with three distinct flavors (Fashion, Green, and Panda), allowing users to switch seamlessly between them with a single tap for a personalized shopping experience.

Implemented time-based product purchasing and vendor-specific timing, offering flexibility and convenience for users to shop according to their preferences.

- Integrated coupon offers and Panda Coins to provide users with additional discounts, enhancing the value proposition of the platform.
- Enabled real-time delivery boy location tracking, ensuring customers can monitor their orders from purchase to delivery for improved transparency.
- Developed location-based product suggestions, allowing the app to recommend products based on users' geographic location, enhancing the shopping experience with relevant choices.
- Play store Link: https://play.google.com/store/apps/details?id=com.qbuypanda.app&pcampaignid=web_share
- App store Link: <https://apps.apple.com/in/app/qbuypanda/id6690916>.

Lavesco - Job portal

- Developed a job provider and customer platform: Created an online system where job providers can post job listings, and customers (job seekers) can apply for jobs.
- Integrated job posting and application flow: Implemented a feature that allows job providers to post jobs, and customers to apply for them.

Job provider management: Job providers can track the number of job applications, view applicants, and manage job status updates.

Customer profile management: Customers (job seekers) can create and update their profiles, including skills, education, and qualifications.

- Seamless updates for both providers and customers: Changes made by job providers, customers, or the admin are automatically synced and updated across the platform.
- Utilized Redux Toolkit for state management: Implemented Redux Toolkit to manage the application state efficiently
- Job seeker Link: https://play.google.com/store/apps/details?id=com.lavescojobs&pcampaignid=web_share
- Job provider Link: https://play.google.com/store/apps/details?id=com.LavescoJobProvider&pcampaignid=web_share.

Rightpath - Customer Web App

- Medical Card Purchasing Platform: Developed a platform that allows users to purchase medical cards for individuals, families, or corporate groups.

Built with Tailwind CSS, React Context, and React Router DOM: Utilized Tailwind CSS for responsive, modern UI design, React Context for efficient state management across components, and React Router DOM for seamless and intuitive navigation between pages and components.
